

Architecture of Play: Design for Discovery

Virtual Child Care Provider Workshop

Design an environment and curriculum that maximizes early learning, cognitive development, and independent discovery.

- **"Heavy Work" Benefits:** Use physical activities (pushing, pulling, lifting) to build motor skills, improve focus, and support brain growth.
- **Curriculum Design:** Arrange spaces and use "loose parts" to spark creative problem-solving.
- **Inclusive Activity Planning:** Easily adapt play opportunities and lesson plans for children with disabilities or developmental delays.

Tuesday, June 23rd
6:30pm-8:00pm

Free Learning Toolkit!
(For providers in El Dorado & Alpine County)
